

Atlantic Shark Commercial Fishery Update

Below are the preliminary landings estimates in metric tons (mt) and pounds (lb) dressed weight (dw) for the Atlantic Shark commercial fisheries from **January 1, 2011, through January 31, 2011**. Most of these preliminary landings estimates include landing reports received through January 31, 2011; shark research fishery estimates include landing reports received through February 15, 2011. The landings presented below are total landings reported through the Pelagic Dealer Compliance (PDC), and the Accumulated Landings System (ALS). Landings within the shark research fishery were determined from trip tickets provided to the National Marine Fisheries Service (NMFS) by scientific observers. The estimates include landings by state-only permitted vessels, federally permitted vessels, and the 2011 shark research fishery participants. **NMFS encourages fishermen to avoid blacknose shark catch in order to keep the non-blacknose SCS fishery open as long as possible.**
